

SURGE TESTERS / IEC 61010 12kV 2 ohm Combo Tester

MegaPulse 1.2x50/8x20-12kV±2 ohm

➤ IEC 61010 Surge Tester with 1.2x50/8x20 2 ohm output: 500V - 12kV

➤ FEATURES

A Compliance West Surge Tester. That means it outputs a guaranteed waveform but won't break the bank. We don't believe in frills that never get used but we do believe in providing a user-friendly, reliable tester that outputs the waveform it is supposed to, time after time.

The MegaPulse 1.2x50/8x20-12±2ohm waveform is in tolerance with the requirements of IEC 61010 Para. 14.9 and Tables 17-18 from 500V - 12kV with 2 and 12 ohm output taps. The relay is built with tungsten contacts for a 30,000 cycle life into a dead short before maintenance is required. (Normal insulation testing will result in much longer relay contact life). 30 second duty cycle time conforms with IEC 61010 cycle times. Available with manual (MegaPulse 1.2x50/8x20+2ohm) and switch-selected polarity reversal (MegaPulse 1.2x50/8x20-12±2ohm). Switched polarity model also available with PLC or computer control.

Built in the USA. Serviced in the USA by the guys who designed and built it. Email and phone support free for life. Reasonable repair and calibration charges. If you can't get it fixed, why buy it?

The blue box that tests. And tests.
