For Immediate Release

October 22, 2021

Compliance West USA Announces the USB Controlled 5000V 200mA AC/DC TD Hipot: High Current Hipot Testing with USB control and reporting

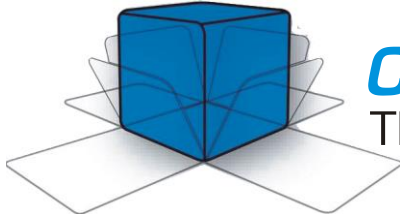

Touchscreen Control and Data Reporting for large hipots

San Diego, CA USA – October 22, 2021 – Today, Compliance West USA announced immediate availability of the model **HT-5000P AC/DC 200mA TD** Touchscreen hipot tester for Lab and Production Environments. It provides automated high voltage, high current hipot testing with USB and Touchscreen control and data reporting.

The tester has four test sequences that can be called from the screen or via USB control. A 7-inch color touchscreen monitors test progress and provides the user with output voltage, leakage current and elapsed test time during the test. Test results of Test Pass/Fail, maximum voltage and current delivered and test duration are displayed on the touchscreen after the test and can be sent via USB to network storage locations.

COMPLIANCE WEST USA

The blue box that tests. And tests.

“This control module provides a simple interface with powerful reporting for automated testing of large datacenter and EV chargers or any other equipment requiring high voltage, high current hipot testing. The USB controlled hipots are compatible with our family of [interlocked safety test enclosures](#). Further, the USB control and data reporting features can be built into any of our heavy hipots, such as our [HT-3000P AC 1A V2](#) Hipot tester,” said Jeff Lind, President.

Compliance West USA HT-5000P AC/DC 200mA TD availability

The Compliance West USA HT-5000P AC/DC 200mA TD is available from Compliance West USA directly and from their distributors in the United States and worldwide. Information about other voltage and current levels are also available upon request.

Follow the link for further information about the [HT-5000P AC/DC 200mA TD](#).
