Relay-Isolated Interface Questionnaire

Company: _____

Contact: _____ Phone: _____

Inputs:

1. Test charge control - sending the tester a voltage signal energizes a relay to charge the bulk capacitor. Specify desired relay coil voltage:

5Vdc 12 Vdc 24 Vdc Other: _____

2. Test trigger control - sending the tester a voltage signal energizes a relay to trigger the pulse. Specify desired relay coil voltage:

5Vdc 12 Vdc 24 Vdc Other: _____

3. Test reverse polarity control - sending the tester a voltage signal energizes a relay to reverse the polarity of the waveform. Specify desired relay coil voltage:

5Vdc 12 Vdc 24 Vdc Other: _____

Connector style:

Terminal Block (three separate 2 position blocks, mounted on rear panel (separate returns for each relay.)

Terminal Block (one 4 position block, mounted on rear panel (common returns for all relays.)

Other - please specify. Customer may need to provide connector:
