Coupling / Decoupling Network for 240VAC / 8A

- The MegaPulse CDN 240/8 is designed to allow surge testing to be conducted on the mains line of operating equipment.
- The CDN is designed to EN 61000-4-5 Figure 7 and protects the attached Surge Tester outputs from line voltage, and the mains voltage generator from the Surge Tester outputs.
- The MegaPulse CDN 240/8 does not generate surge voltages.

Features

- Up to 7kV peak surge test voltage.
- Cables, manual and calibration certificate included.
- One year calibration cycle.
- One year warranty.
